AUDIT FINDINGS

NARRATIVE

The site-visit portion of the PREA audit of the Mountain Home Academy was performed March 14-16, 2016, in Mountain Home, Elmore County, Idaho. Present throughout the visit were Executive Director Kelly Stone, and PREA Compliance Manager Tanesha Fane. Others present at various times included Group Living Director Demetric Fane, Nurse Carol Litz, Clinical Director Cody Ellis, Education Director Vance Griffin and others.

During the audit visit, the population of the facility was 51 residents. The number of staff is 56.

All areas of the facility were toured, including the seven buildings on campus. The buildings housed the kitchen/cafeteria, administration, education, dorms, medical, etc.

Interviews were held with staff and residents. Staff from all shifts were interviewed, including night shift. 12 staff were formally interviewed, with other staff contributing through informal interactions as we toured the facility. 11 residents were interviewed. Both staff and residents were selected randomly from rosters presented to me at the start of the audit.

The audit went very well, and due to the fact that other Sequel facilities had been previously audited and had shared information, there was a minimal amount of corrective action deemed necessary.

DESCRIPTION OF FACILITY CHARACTERISTICS

Sequel TSI of Idaho's Mountain Home Academy is a sixty-bed therapeutic residential treatment center for adjudicated and non-adjudicated adolescent males, ages 10-18 with sexually maladaptive behavior problems. The campus includes a six-bed dorm for students with Neurodevelopmental Disorders whom also exhibit sexually maladaptive behaviors.

Mountain Home Academy's clinical team utilizes a balanced & restorative justice approach in treating the mind, body and spirit of each student. Clinical interventions focus on changing destructive, deviant patterns of thought and in turn the behaviors related to those thought processes. Students participate in individual, group, and family therapy, focusing on their sexual behavior problems, as they progress toward graduation. Early stages of treatment emphasize accountability, responsibility and victim empathy. Later stages of treatment integrate a restorative justice approach as the student works through clarification (when appropriate) and relapse prevention planning in preparation for community reintegration.

All students at Mountain Home Academy are part of a community that promotes a Normative Culture System utilizing a Group Guided Interaction (GGI) method. In this system, conformity is achieved largely via commonly accepted group norms collectively endorsed and enforced by all program participants. A level system based on weekly ratings and related rules enforced by trained staff also provide additional support and structure for students in the program.

At the time of the audit, the facility was out of compliance with this standard in two areas.
